Re: Radiation Concerns

Dear Bob:

This will acknowledge receipt of your letter to me dated October 6, 1983, which was in response to our request for additional information and assistance in the area of radiation protection. As you know, this is of primary concern to the Pueblo. While certain studies were performed here at the Pueblo in the past, I cannot locate any written reports indicating what conclusions were reached or remedies proposed. I would very much appreciate an opportunity to sit-down with Mr. Bliss in order to discuss EPA's previous findings as well as the agency's future role in the EIS process. Please coordinate the dates and arrangements with Ron Solimon.

Thank you for your assistance.

Sincerely,

PUEBLO OF LAGUNA

Edwin M. Martinez
